

Focus Class: Mechanical Cabinet

Two-Day Intensive Training Workshop

In response to customer requests for smaller factory training classes that concentrate on a single governor type, we are pleased to offer a Focus Class on the **Woodward Mechanical Cabinet Actuator**. Whether you are an experienced governor mechanic or an apprentice technician, this two-day intensive workshop will enhance your knowledge of this governor type. Focus Classes feature **more hands-on time** and less classroom time, so are ideal for governor technicians who are responsible for tuning, adjusting and troubleshooting governors.

Our trainers have decades of experience building, calibrating and repairing Woodward governors, oil systems and auxiliaries, and our **Training and Repair Center** features working examples of a Woodward Mechanical Cabinet Actuator, Permanent Magnet Generator (PMG) and XX Herringbone Gear Pump. **Real-world problems** will be introduced into the governor, and attendees will be challenged as a group to find and correct them. These intensive troubleshooting sessions, combined with smaller class size, are what make Focus Classes so effective as a training tool for your maintenance crew.

Focus Class – Mechanical Cabinet Actuator

Provides in-depth hands-on training on the following topics:

- Mechanical Cabinet Actuator, including:
 - Flyball Assembly
 - Dashpot and Dashpot Bypass
 - Pilot Valve Assembly
 - Restoring Links and Levers
- Permanent Magnet Generator
- XX Herringbone Gear Pump

Date: **Sept 28 – 29, 2010**

Class Fee: **\$2,495.00** (includes lunches and your training manual)

Class size will be limited to **30 people** to maximize transfer of knowledge. Please **register early** to avoid disappointment. Complete the attached Registration Form and fax to **(215) 354-1782**. Class will be held at our Amherst Training Facility. Lodging and transportation not provided; available in Stevens Point WI. **Questions?** Call your nearest Regional Office.
