The **System Assessment and Fleet Evaluation (SAFE™)** Program provides operators with a systematic review of your governor system's maintenance needs, operational issues, and long-term maintenance services using the right mix of resources, experience, and execution.

American Governor Company now offers a program that will enable your plant to obtain reliable operation while executing a cost-effective, long-term, and predictive maintenance program. The SAFE™ Program is a comprehensive parts, maintenance, and technical service program that continuously improves your plants' availability.

AGC is committed to supporting all your governors, regardless of manufacturer or model, with parts, field service, technical support, training, and custom engineering for as long as you wish to keep them in service.

With the SAFE™ Program, you can tap into a wealth of resources, experience, and expertise at an affordable price.

SAFE™ Program

Predictive Maintenance Program

How Does It Work?

The AGC SAFE™ Program is a 5-year Predictive Maintenance Fleet Program that provides an annual inspection assessing virtually every aspect of your Governor system. The inspections, analysis, and services will be custom-tailored for your specific plants and the units making up your entire fleet. A predictive maintenance program is provided that allows you to pick and choose the areas to service from our prioritized recommendations.

Annual Governor Inspection

At the beginning of the program, our governor experts thoroughly assess the performance of each governor and prepare a report describing and prioritizing each unit's current or future maintenance needs. Through our SAFE™ inspection process, we provide you with information you need to implement a cost-effective maintenance program that will help you to monitor and optimize governor performance.

We provide:

- Design Review for each unit
- Failure Mode Analysis
- Availability Analysis
- Governor Outage/Maintenance Recommendations
- Cybersecurity Assessment
- Lifecycle Analysis
- Spare Parts Inventory and Readiness Analysis
- Critical Spares Recommendations
- Documentation Review, Assessment, and Archiving
- Governor Dashboard (Systemwide)
- One free participant entry into Governor School training per agreement (up to \$3,500 value)
- Free priority telephone technical support

Please consult your Regional Office for more information on our SAFE™ Program.
